

Founded in 1889 in Milan, Italy, ANGELO BOMBELLI COSTRUZIONI METALLICHE SRL has evolved from being a pioneer in the construction industry structural steelwork sector to become an international point of reference in the manufacturing of airport ground support equipment (GSE), cargo handling equipment, cold chain solutions and snow removal equipment.

Our focus on innovation, careful selection of suppliers and control over our production processes together with customer centricity, enables us to guarantee high quality products which are perfectly suited to meet and exceed our customers' needs.

Throughout the years, this has allowed us to supply and create solid long-term relationships globally with major airports, airlines, ground/cargo handling companies and equipment rental companies.
