

Your Future Our Business.

COMPANY PROFILE – 2025

Our Products

METCO works closely with leading global technology providers to deliver advanced security, screening, and EOD systems across the Kingdom of Saudi Arabia.

Beyond supplying equipment, METCO is responsible for **system design, integration, installation, commissioning, training, and long-term operational support**, while supporting **localization of knowledge** and capability in line with national objectives.

SCIENTIFIC

Our Products

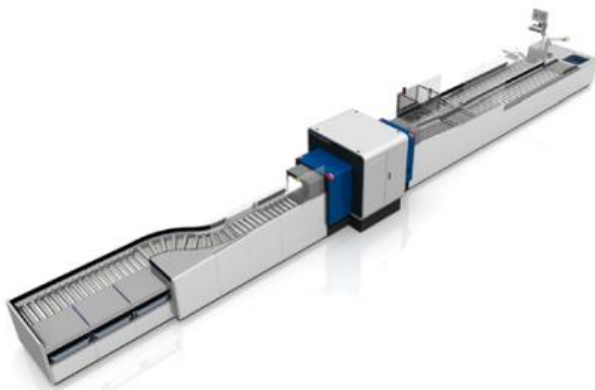

For over 10 years, **Smiths Detection**, a **U.K.**-based global leader in threat detection and screening technologies, has been our key partner in X-ray screening, providing a range of advanced technologies and products, such as:

Checkpoints & Passenger Boarding Screening Systems

Diffraction technology

IONSCAN, XCT, CTiX Product Lines

iCMORE, TSA, CAAC and all the latest capabilities in screening technology

Our Products

Teledyne FLIR, a **U.S.**-based leader in advanced thermal imaging, radar, and sensing technology, provides innovative solutions for diverse applications, including border security such as:

Advanced Radar systems

Thermal imaging infrared cameras

Our Products

CEIA, an **Italy**-based company with a rich history of success in metal detection, leverages over 50 years of experience. In areas of security detection, CEIA excels with their wide innovations in products, including:

Hand-Held Metal Detectors (HHMD)

Walk Through Metal Detectors (WTMD)

Shoe Explosive Detectors & Combined Shoe Metal Detector (SAMDEX)

Our Products

TELEROB, a **German** company renowned for its innovative unmanned platforms, delivers mobile systems with manipulators for sampling suspicious substances, as well as advanced robots for detecting and disarming explosives and investigating chemical or biological threats.

Our Products

With a mission to make the world safer, **Dynasafe**, headquartered in **Sweden**, has been at the forefront of innovative solutions for UXO and IED disposal, significantly enhancing public safety and security. Their patented explosive containment chambers provide full protection from blast fragmentation and toxic materials, with flexible designs tailored to meet diverse market needs.

Our Products

VIKEN DETECTION

Viken Detection is a **U.S.**-based leader in advanced threat detection systems headquartered in Burlington, Massachusetts. With manufacturing rooted in American innovation, Viken empowers law enforcement, border protection, corrections agencies, airports, and security professionals with state-of-the-art detection tools designed to uncover concealed threats safely and effectively

Handheld Scanners

Fixed Vehicle Scanners

Mobile Scanners

HANDHELD: **RAVEN, FOXHOUND, PB200E**

Handheld Imagers

Chemical Analyzers

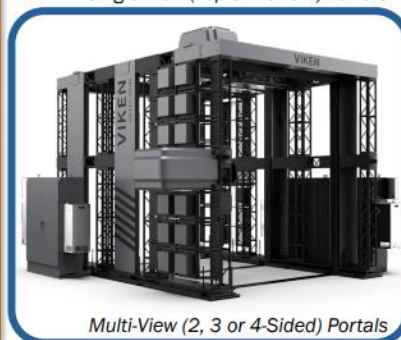

Lead (Pb) Analyzers

FIXED VEHICLE SCANNERS: **OSPREY, HARRIER**

Single-View (Top or Bottom) Portals

Multi-View (2, 3 or 4-Sided) Portals

MOBILE SCANNERS: **OSPREY, HARRIER**

Mobile (Chassis) Scanners

Trailered Mobile Scanner

Our Products

BEUMER Group, headquartered in **Germany**, is a global leader in intralogistics solutions, specializing in innovative systems for conveying, loading, palletizing, packaging, sortation, and distribution. Their advanced technologies enhance material handling efficiency across various industries such as:

Baggage Handling Systems (BHS)

Sortation Systems

Integrated Cargo Solutions

Parcel Handling Systems

Our Products

Bruker, headquartered in the **U.S.** , is a leading provider of life science research and diagnostic solutions, empowering scientists to enhance human health. With over 9,700 employees worldwide, Bruker drives innovation across various applications in analytical instrumentation. Products & technologies include:

Narcotics Trace Detection (NTD)

Explosives Trace Detection (ETD)

Ion Mobility Spectrometry (IMS)

Our Products

Apstec, a **Swedish**-owned company, creates advanced security screening technology to enhance global safety. Working with public and private organizations in over 30 countries, Apstec supports the adoption of next-generation screening solutions to improve security and user experience. Recent products include:

Human Security Scanner (HSS) Falcon

Human Security Radar (HSR)

Our Products

OPTEX, a Japanese leader in sensor and security technologies, delivers advanced solutions for perimeter protection and intrusion detection across critical sites such as airports, military bases, and industrial facilities. Some of these technologies include advanced fiber optic detection systems, intelligent laser sensors, and next-generation buried line sensors.

Intelligent Laser Detectors

Distributed Fiber Optic Sensors

Buried Line Sensors

Our Products

Thermo Fisher Scientific, a global leader in advanced science and technology, provides innovative solutions to make the world healthier and safer. Its security technologies support first responders, law enforcement, military, and government agencies helping protect airports, seaports, industrial sites, and critical infrastructure. Some of their products include:

Portable Chemical Identifier

Handheld Narcotics Analyzer

Radiation Detection Backpack

Dosimetry instruments

Spectroscopic Area Monitors
